noblesjarrett035@gmail.com ❖ (478) 973-5781 ❖ Macon, GA

EDUCATION

Bellevue University *August 2024 – April 2026*

Master of Science — Computer Information Systems | GPA: 3.9

- First place winner of the 2025 NASA International Space Apps Challenge
- Upsilon Pi Epsilon Honor Society member

Mercer University *August 2020 – May 2023*

Bachelor of Science — Information Science & Technology | Minor: Computer Science | GPA: 3.33

- Inducted into Upsilon Pi Epsilon Honor Society
- President's List — 3 Semesters
- Finished 3rd place in the Booz Allen Hamilton Programming Contest
- Mercer University Programming Contest Organizer

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C#, C++, C, Go, PHP
Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend & Databases: Node.js, SQL, MySQL, PostgreSQL, Supabase, LAMP Stack
Cloud & DevOps: Microsoft Azure, Vercel, Git, GitHub
Networking & Infra: Cisco IOS, Cisco Meraki, WAN/LAN, VLANs, CAT6 Cabling
Methodologies: Agile, Scrum, Agile User-Centered Design

WORK EXPERIENCE

Mercer University I.T. Network Department | Telecommunications Intern *Macon, GA | May 2022 – June 2023*

- Developed Python scripts to aggregate and analyze blocked IP address data across multiple servers, improving network security visibility and reducing manual review time
- Installed and deployed Cisco Meraki networking devices as part of a campus-wide infrastructure upgrade serving thousands of students and faculty
- Configured and maintained network devices using Cisco IOS CLI and the Meraki dashboard, including switch provisioning, port configuration, and VLAN setup
- Resolved student and staff IT tickets involving network troubleshooting, CAT6 cabling, RJ-45 termination, and switch configuration across WAN/LAN environments
- Performed patch panel punch-downs and cable testing, verifying adherence to T568A/B standards

Central Georgia Technical College | I.T. Help Desk Intern *Macon, GA | Aug 2019 – May 2020*

- Provided desk-side and remote technical support to students and staff, diagnosing and resolving hardware, software, and network connectivity issues
- Diagnosed and repaired desktop and laptop systems, including hardware replacement, OS installation, and system configuration
- Configured Cisco lab environments for student training, building and testing LAN topologies to support hands-on coursework
- Simulated real-world troubleshooting scenarios by intentionally introducing hardware and system faults for student diagnostic exercises

Southeastern Systems Technologies | Structured Cabling Installer *Macon, GA | May 2017 – Feb 2023*

- Installed and terminated CAT6 and fiber optic cabling in commercial environments, including fiber splicing, testing, and troubleshooting
- Installed server racks, patch panels, and cable management systems; performed RJ-45 terminations and patch panel punch-downs (T568A/B)
- Conducted cable testing and validation using diagnostic tools; interpreted network diagrams and collaborated with IT teams during installations

PROJECTS

FairwayIQ — *Full-Stack Golf Statistics & Analytics Platform*

- Architected and built a secure, full-stack golf analytics web app featuring authenticated user dashboards, automated handicap calculation, course management tools, and hole-by-hole round tracking
- Designed a scalable PostgreSQL backend with Row-Level Security (RLS), triggers, and stored functions via Supabase; deployed to production on Vercel
- Initiated a companion iOS mobile app built in Swift to extend the platform to mobile users

Stack: *Next.js 16, React 19, TypeScript, Supabase, PostgreSQL, Tailwind CSS, Recharts, Vercel, Swift*

Mercer University Alumni Map — *Full-Stack Alumni Tracking Web Application*

- Led architecture and development of a LAMP-stack alumni mapping application integrating the Google Maps JavaScript API, enabling alumni to register, create profiles, and place location pins
- Designed the MySQL database schema and front-end components supporting dynamic filtering by major, graduation year, and employer with real-time data retrieval

Stack: *PHP, JavaScript, HTML5, CSS3, MySQL, Google Maps API*

Coral Olson Photography — *Responsive Professional Portfolio Website*

- Built a minimalist, mobile-optimized photography portfolio with interactive galleries, smooth navigation, and SEO metadata; deployed with a custom domain via GitHub Pages

Stack: *HTML5, CSS3, Bootstrap, JavaScript, GitHub Pages*
